

JOBMAN

WORKWEAR

2017

Durability at work since 1975

Find the right workwear

How many features and how much protection do I need?

Functionality need

Activity level

How much do I move during the day?

How to choose?

To help you select the right clothing for your work, we have categorized all our products according to their level of functionality. We have called the levels Functional, Technical and Advanced. In each category we have optimized the performance of garments, balancing cost with specification. All this to make it easier for you to choose exactly what you need at work.

What you wear matters. Your clothes protect you of course, but they should also be comfortable, easy to wear and an effortless extension of the equipment you use throughout the working day. Every profession has its challenges and requirements. With Jobman you will find the workwear you need because we consider you the experts. We work with our customers, all professionals in their field, to listen and learn and then to develop the workwear to match their requirements and professional pride.

FUNCTIONAL

Our Functional clothing has been developed for occupations where carrying tools is less important than comfort and having multi-functional workwear. If you work indoors or sit in a vehicle most of the day, Jobman Functional workwear is the category where you will find professional, practical and good looking clothes that provide some protection for when you need to pitch in. Functional is flexible clothing for a professional look all day.

TECHNICAL

Jobman Technical workwear is for Professionals who carry tools on the job and who expect their clothes to protect them at work. If you work both inside and outdoors, if you need hand and power tools and if you are likely to get dirty, Jobman Technical workwear is the category for you. Our Technical workwear provides protection and many smart solutions to help you carry all the stuff you need. The clothes are also comfortable and easily smart enough for the pub after work.

ADVANCED

Advanced clothing from Jobman is for professionals who demand the best to meet the challenges of their work: dirt, sharp tools and tough working conditions. The Advanced collection has the highest level of protection and functionality and provides solutions for carrying all kinds of tools and for work in the most hostile environments. Garments are made from comfortable, hard-wearing that keep you safe and feeling great. If you live all day in your workwear it should be the best, like a tool of the trade.

Workwear for proud professionals

Workwear made for and by professionals

Jobman develops and manufactures workwear with contemporary design of extremely high quality and performance for professionals of all trades.

Our mission is to provide our wearers with clothes that meet all their expectations of functionality, performance and protection while being supremely comfortable and practical to wear.

Our vision is to make all our customers satisfied and proud to wear Jobman Workwear every day.

Jobman's products are sold via dealers

Our products are sold through a worldwide network of local dealers. If your dealer does not stock Jobman, contact us and we will find you a local supplier. You can find all our dealers listed on our website, www.jobman.se.

Sizes that really fit, clothes that work as hard as you and the most durable fabrics we can find. This is important because you spend many hours a day, year in and year out, in your workwear.

Developing workwear that is just what you need, no more, nor less, takes know-how, an eye for detail and a lot of experience.

There are no short-cuts to expertise. Jobman is all about feedback and collaboration with the professionals who wear our clothes. This is our way to innovation, new materials and better workwear for you.

Your contribution is welcome!

JOBMAN

WORKWEAR

What are our clothes made of?

Textiles are produced from many different materials, some natural and others man-made. All have different uses and purpose when manufacturing fabrics for workwear.

Natural fibers are well known; cotton, silk, wool and a few more. Man-made, synthetic fibers are often made from oil derivatives and have names like polyester, polyamide, Nylon and acrylic.

All fibers have different properties that often make them better suited for one purpose than another. Cotton for example has excellent moisture absorbing qualities and it can be very soft and nice to wear. Polyester is crease and fade-resistant, and it does not shrink. By blending fibers you get the best of both worlds in the same fabric and thereby get a new functional material.

Today's technology allows us to develop materials with designed properties and manufacture workwear that is lightweight, wear and tear resistant, dirt repellent and whatever we wish for.

We have put a lot of effort into developing materials with just the right composition for our workwear. The best result often means applying materials with different features to strategic parts of the garments to add strength or protection while keeping the design comfortable and easy to wear. We go the extra mile to make Jobman Workwear your first choice and to exceed your expectations.

Bomull

Cotton is the most common fiber; soft, natural and comfortable and easy to wash. Jobman pre-washed cotton twill is extra sturdy and durable, it ages beautifully, retains its properties and just gets more comfortable by each wash. One advantage of cotton is that it is relatively resistant to glow fleas from grinding, although it cannot replace flame retardant clothing.

Keep in mind that cotton absorbs moisture, and is therefore not always suitable for working in damp environments.

Cavalry twill

One of the strongest twills ever designed is cavalry twill, originally designed for military breeches. Its structure gives the fabric movement and stretch. Cavalry twill is most appropriate for trousers and is ideal for environments where you need a durable yet flexible fabric. Cavalry twill is recognized for its distinctive diagonal stripe effect.

Polyester/Cotton

Cotton can be blended with polyester in different combinations to achieve a wide variety of characteristics. Blending achieves the best of both worlds, the softness of cotton and the resistance of polyester, making our cotton/polyester blends very comfortable and hard wearing. They are virtually care-free, perfect for workwear, as they can be washed often with little risk of fading or creasing. Cotton/polyester blend clothes keep their shape and are very suitable as profile or uniform clothing.

Cotton/Polyamide

The cotton/polyamide blend is a comfortable fabric which is water and dirt repellent and well suited for clothing intended for dirty environments. Cotton/polyamide does not absorb moisture so easily and dries much faster than pure cotton. The fabric is comfy to wear and can take a lot of wear and tear without losing its appearance. This is a good fabric for workwear in challenging work environments.

Polyester

Many of our winter clothes and soft shell jackets are made of polyester. It is the most common fabric after cotton. Polyester clothes are comfortable, they stay soft and their low absorbency allows them to dry quickly. The fiber has excellent resilience and it can be woven, knitted and spun to fleece. Easy to wash, doesn't fade and has a high abrasion resistance too, but polyester cannot be ironed too hot as it is not heat resistant.

Star HV polyester

Star Polyester is one of Jobman's new self-developed strong materials. It is a modern 100% polyester. A dobby weave, meaning mixed bonds, which give the appearance of a small star when you look closely. The unique feature of STAR is that it is equally strong in all directions which provides a well-balanced and durable fabric. The back is lightly brushed, peached, to give a soft feeling against your skin.

Polyamide

Polyamide is a fabric typically added to make clothes more abrasion resistant. Polyamide can take a lot of wear and tear yet it is a soft and comfortable material and it does not freeze stiff in cold weather. Clothes made from polyamide are resistant and well suited for work both outdoors and indoors. Dirt and sweat is no problem as they are easy to wash and quick to dry.

Star Polyamide

STAR is Jobman's own development, a highly very wear and tear resistant fabric we developed for very challenging environments. It is a modern 100% polyamide, 'dobby' weave. Close up you can see the little geometric star pattern of the dobby loom. One unique feature of our STAR Polyamide is that it's equally resistant to tear and rip in all directions. The back of the fabric is 'peached' for a soft and comfortable feel on the inside. STAR Polyamide workwear can be worn all year around in all kinds of weather, it dries fast and is a good companion all day.

Core

Ring-spun cotton/polyester is a unique quality with the best of two worlds. The technology provides a core thread of polyester which is enclosed by cotton. Polyester fabric gives high durability and cotton gives nice comfort against the skin.

Materials for functionality

Reinforcement fabrics

Workwear is worn many hours a day and should be comfortable as well as protective. To achieve this we need to combine different fabrics to add functionality to a design. A nice, soft piece of clothing is trimmed with reinforcing fabric on critical parts to make it hard-wearing. Jobman Workwear protects you all day, inside and outdoors. Commonly used reinforcement materials include Cordura®, Kevlar® and FA, a fabric developed by Jobman.

Coated fabrics

Our winter outdoor wear are made from heavy polyester with a polyurethane coating to make them wind-proof and water repellent. The coating is not completely water-proof to allow the fabric to breathe, which keeps you warm and dry all day.

Linings and middle layers

To keep warm you need to wrap yourself in warm air under a wind-proof shell material. This is why middle layers are made from light, porous materials that trap a lot of air, which in turn is warmed up by body heat. Examples of such materials are fleece, quilt and pile, all with great warmth-to-weight ratio.

Next to your skin

Wearing many smart layers will keep you dry and comfortably warm all day. The layer next to your skin should be breathable and moisture wicking. The next layer should be insulating, by trapping warm air close to your body. When the temperature falls to arctic levels you need underwear of wool or polypropylene, and don't forget the extra pair of socks and a woolen beanie. Jobman has the clothes for any kind of weather.

Cordura®

Cordura® is a polyamide fabric with high strength and excellent abrasion resistance. Often used to reinforce and protect knees and other exposed parts.

Kevlar®

Kevlar® is a para-aramid fiber with extremely high tear and abrasion resistance.

FA™

FA is Jobman's own development to reinforce workwear. It has great strength and resistance against sharp objects like nails and tools, a perfect material to protect you in the workshop and out on the building site.

4-way stretch.

Jobman 4-way stretch is created by synthetic fibers with exceptional elasticity. It provides extreme comfort, fit and flexibility and the opportunity for a tighter fit, without restricting movement. The wear resistance is high and since the material is elastic it returns to its original shape and size when it is no longer stretched.

Dry-tech™

Dry-tech™ is a man-made fabric which has wicking properties; it absorbs moisture and pushes it to the outside, where it will evaporate in microscopic particles. Dry-tech™ will keep you fresh and dry all day. Dry-tech™ will not fade or shrink and needs no ironing. It can be washed every day and dries quickly. Dry-tech™ is designed to be worn next-to-skin.

Quilt

Quilt is a layered material with polyester filling stitched between two layers of thin, smooth fabric. It is lightweight also, even when it is very thick. Quilted linings are common in workwear for outdoor use in cold weather. Quilted workwear is popular since it does not restrict your comfort; the silky, smooth surface allowing layers of clothing underneath to move.

Pilefoder

Pile is a furry lining material suitable for winter wear. Polyester pile does not absorb moisture and will dry quickly. It also holds a lot of air and will keep you warm.

Fleece

Polyester fleece is a very popular fabric, you find it in sweaters, in linings and trimmings. It stretches and feels soft. Its fluffy texture keeps you warm by trapping air between its fibers. Fleece is ideal when the weather gets a little chilly and it is a good lining for wind proof clothes.

VISIBILITY CLOTHING

LAYER UP!

- 1** The first layer should transport humidity out to the next layer; ideally, technical underwear made from synthetic materials.
- 2** The mid-layer should be insulating fleece, soft shell or furry material. Jobman's microfleece garments are extremely comfortable and ideal middle layers.
- 3** The third layer should be wind-proof and waterrepellent to protect you, but must be able to breathe and allow humidity from the first two layers to evaporate.

5596 ADVANCED

8393 Beanie
 Beanie with Jobman logo.
 Material: 70% acrylic / 30% wool.
 Art no: 65839383-3099 orange/black
 Size: One size

8376 FUNCTIONAL

BEANIE

8376 Beanie
 Lined high visibility beanie in yellow with knitted reflectives.
 Material: 70% akril / 30% wool, fleece lining.
 Art no: 65837683-2100 yellow
 Size: One size

9045 FUNCTIONAL

BEANIE

9045 Durable Beanie
 Knitted beanie.
 Material: 100% acrylic
 Art no: 65904583-9900 black
 Size: One size

9047 TECHNICAL

BEANIE

9047 Wool Beanie
 Knitted beanie with windproof membrane.
 Material: 100% wool
 Art no: 65904783-9900 black
 Size: One size

8364 FUNCTIONAL

BEANIE

8364 Beanie
 Knitted beanie.
 Material: 50% acrylic / 50% wool.
 Art no: 65836483-1710 brown/wfite
 Size: One size

8391 FUNCTIONAL

BEANIE

8391 Beanie
 Beanie with fleece lining.
 Material: 70% acrylic/30% wool.
 Art no: 65839183-9899 gray/black
 Art no: 65839183-9930 black/orange
 Size: One size

9691 TECHNICAL

HELMET BEANIE

9691 Helmet Beanie Coolmax®
 Helmet beanie with a tight fit in Coolmax® fabric that wicks away moisture. Machine washable.
 Material: 100% polyester Coolmax®
 Art no: 65969183-9900 black
 Sizes: One size

9050 FUNCTIONAL

HELMET HOOD

9050 Helmet Hood
 One size. Flannel lining
 Material: 100% cotton
 Art no: 65905083-9900 black
 Size: One size

NEW!

9490 TECHNICAL

NAIL POCKET

9490 Nail Pocket

Insert pocket that is inserted into a holster pocket. Drawstring at the top. Reversible. Suitable for nails, screws, etc.
Material: 100% polyamide Cordura®

Art no: 65949083-9900 black
Size: One size

NEW!

9491 TECHNICAL

HOLSTER POCKET

9491 Holster Pocket

Holster pocket which can be attached to your belt. Useful if trousers do not have fixed holster pockets or if you for example want an extra at back.
Material: 100% polyamide Cordura®

Art no: 65949183-9900 black
Size: One size

9011 TECHNICAL

BRACES

9011 Braces

Braces with clips. Elastic. Adjustable length.
Material: 70% polyester/30% elastane

Art no: 65901184-9900 Black
Size: One size

9916 FUNCTIONAL

ID-CARD HOLDER

9916 ID-card Holder

Easy to insert and remove card.
Material: Plastic.

Art no: 65991684-9900 black
Size: One size

9915 FUNCTIONAL

ID-CARD POCKET

9915 ID-card Pocket

Attaches to belt or a button.
Material: 100% polyester

Art no: 65991584-9900 black
Size: One size

9283 FUNCTIONAL

BELT

9283 Retro Belt

Belt made of polypropylene with metal buckle.
Material: 100% polypropylene.

Art no: 65928384-3099 orange/black
Sizes: 90 cm, 120 cm

9280 FUNCTIONAL

BELT

9280 Stretch Belt

Max. length 130 cm. Stretch feature for extra comfort.
Material: 100% polyester

Art no: 65928084-9900 black
Size: One size

9282 TECHNICAL

BELT

9282 Stretch Belt "No scratch"

Stretch feature for extra comfort. Plastic buckle reduces the risk of scratches.
Material: 100% polyester

Art no: 65928284-3000 orange
Art no: 65928284-6700 navy
Art no: 65928284-9800 dark grey
Art no: 65928284-9900 black
Sizes: 90 cm, 120 cm

9275 FUNCTIONAL

BELT

9275 Belt

Max. length 130 cm.
Material: 100% polyester

Art no: 65927584-9900 black
Size: One size

9306 FUNCTIONAL

BELT

9306 Leather Belt

Leather belt with two-pin metal buckle.
Material: 100% leather.

Art no: 65930684-9900 black
Sizes: 90 cm, 120 cm

9290 FUNCTIONAL

BELT

9290 Belt

Max. length 130 cm. Bottle opener in buckle. Jobman-print.
Material: 100% polyester

Art no: 65929084-9910 black/white
Size: One size

Washing instructions

Washing

All our garments have been tested and labeled with appropriate laundry care instructions. If you follow the instructions your workwear will stay crisp and neat much longer. Always sort your laundry according to washing temperature and color. If a garment is marked "Wash separately" or "Wash with similar colours" it means that the garment could contain excess colour that could colour or stain other garments, especially in light colours. Some dark fabrics can retain residuals of dye and should therefore be washed separately a few times. All dyed materials should be washed in hot water, as hot as the fabric can take. Low temperature can be the cause of fading.

Prewash

Today's modern detergents means there's often no need for a prewash. If the garment has hard to remove stains, it may be worth using a stain removal agent that is sprayed on before washing instead.

What do the laundry care symbols say?

	Water temperature in Celsius		Do not dry clean		Iron at max. 110°C/230F
	Dry clean only		Do not tumble dry		Iron at max. 150°C/302F
	Do not chlorine bleach		Tumble dry at lower temperature (max 60°C/140F)		Iron at max. 200°C/392F
	Cannot withstand dry cleaning fluid stronger than tetrachloroethylene		Tumble dry at higher temperature (max 80°C/176F)		

For washing instructions for each garment, see inside each garment or visit our website www.jobman.se

Detergent

Always use detergent intended for coloured garments and follow the dosage instructions on the detergent packet carefully. Don't use detergent that contains bleach (e.g. perborates, percarbonate and sodium hypochlorite). Always use detergent designed for the washing temperature stated in the garment's washing instructions. Avoid using fabric softener.

Drying

Hang up or tumble dry? It is best to dry almost all garments by hanging them up. Shake the garment, pull out the seams and hang it up. If you do tumble dry it, make sure not to dry the garment completely. Most of the shrinkage and the highest amount of wear from tumble drying happens when the garment is almost dry.

Symbols

Oeko-Tex

Oeko-Tex is an internationally defined standard based on a voluntary undertaking. To obtain a certificate, the entire manufacturing process and all the parts of a garment must comply with stringent human-environmental requirements.

With Jobman Work-wear you can be sure that you will not be exposed to chemicals that may damage your health. Many of our garments are Oeko-Tex certified, which guarantees that they do not contain substances that may be hazardous for the wearer on skin contact.

Flameproof

100% cotton with flame-retardant treatment. CE-certified, tested and approved under EN11611 and EN11612.

This certification means that the material and the design of the garment protect against edge ignition and flame spread, it doesn't melt. It can also withstand heat according to the test standards, preventing burns.

Dry-tech

Read more about Dry-tech on page 9.

High-visibility class

Garments are divided into classes depending on their visibility. Classification is mainly dependent on its conspicuity: the garment's fluorescent area and retro-reflective surface.

Class 3: Highest class. The total fluorescent area must be at least 0.8 m² and reflective strips 0.2 m².

Class 2: The total fluorescent area must be at least 0.5 m² and reflective strips 0.13 m².

Class 1: The lowest class. The total fluorescent area must be at least 0.14 m² and reflective strips 0.1 m².

Kneepads

Certified to: EN 14404: 2004 + A1: 2010, Type 2, Level 1 together with Jobman kneepads art no: 9943, 9944 and 9945.

Rain

All Jobman's rainwear is certified according to the EU norm EN343, the bad weather certificate.

Layering

In cold weather it is important to wear layers of clothing to keep warm. Practical layers you can add or take off are especially important when moving between warm and cold spaces.

1. The first layer should transport humidity out to the next layer; ideally, technical underwear of man-made materials.

2. The middle layer should be insulating fleece, soft shell or furry material. Jobman's microfleece garments are extremely comfortable and ideal middle layers.

3. The third layer should be windproof and water-repellent to protect you, but must be able to breathe, allow humidity from the first two layers to evaporate.

Read more about Jobmans layers on page 12.

Breathable

The symbol shows that the fabric is windproof, waterproof and breathable. For optimum comfort at work, it is important that the body maintains an even temperature and remains dry. A shell garment lets the body breathe and lets out excess moisture that would otherwise have a cooling effect.

Choose the right size

The best way to find the right size of a garment is obviously by trying it on. When trying is not an option you should take your measurements and compare them to the size charts we provide.

This is how to get the right size:

Take your measurements wearing tight underwear and keep the measuring tape close to your body without pulling the measuring tape too tight.

Code of Conduct

Our Code of Conduct

New Wave Group has adopted the BSCI (Business Social Compliance Initiative) Code of Conduct. It contains requirements on minimum wage, working hours, the prohibition of child labour and other requirements from the ILO Conventions and the UN Declaration of Human Rights. The Code of Conduct forms the basis of what we expect from our suppliers when it comes to social and environmental responsibility. We are members of BSCI which is a global initiative for companies committed to improve working conditions in the supply chain. Companies all over the world are working together to address the common struggle of inadequate labour conditions in developing and newly industrialized countries. All members of BSCI are using the same Code of Conduct, meaning that more than 1,200 companies have adopted it. The harmonization of BSCI helps us to create transparency and precision in what we expect from suppliers.

Commitment

The membership of Business Social Compliance Initiative (BSCI) is more than just placing requirements on our suppliers. It also imposes requirements on us. New Wave Group has a commitment to BSCI to engage a proportion of our suppliers in external inspections by third party-auditors. As a result, New Wave Group is working with both internal and external audits.

The environment

The New Wave Group recognizes how closely connected its business activities are to local and global environmental issues. To this end, the Group is actively engaged in "green management", an effort to reduce environmental threats through implementation of business plans that incorporate environmental considerations. Specifically, the New Wave Group is developing plans for Transportation, Eco-friendly offices, Packaging, Chemical use, and 'Green' production.

BSCI (Business Social Compliance Initiative)

BSCI is a business driven initiative for companies committed to improve working conditions in the global supply chain. Our Code of Conduct has requirements on minimum wage, working hours, the prohibition of child labour and other important criteria.

Oeko-Tex

Are your clothes toxic?

Many clothing manufacturers use large amounts of chemicals in the production of their garments, in processes designed to enhance the look of their clothes. In many cases, these chemicals, colour additives, bleaches etc. are harmful, create allergies and may even be carcinogenic. When you wear Jobman Workwear you can be sure that you are not exposed to chemicals that can damage your health. Almost all Jobman garments are Oeko-Tex certified, which provides a guarantee that the garments do not contain substances that can be harmful to the skin of the wearer.

Oeko-Tex Standard 100 – The human environment standard.

Oeko-Tex is an exacting international standard, based on a voluntary commitment. To obtain the certificate, the entire manufacturing process and all parts of a garment must meet the stringent environmental requirements.

Many of Jobman's products are certified according to Oeko-Tex Standard 100. This means that the product does not contain substances that upon direct contact can be harmful to humans. Of course, this has a positive impact on the global environmental issue.

Test criteria:

- Illegal substances such as carcinogenic colourants.
- Legally regulated substances such as formaldehyde, plasticizers, heavy metals or pentachlorophenol.
- Substances which according to current knowledge are harmful to health, but which are not yet regulated or prohibited by law such as pesticides, allergenic dyes or tin-organic compounds.
- Parameters such as colour fastness and a skin-friendly pH-value, which are precautionary measures to safeguard consumer health.

For more information: www.oeko-tex.com

Generally the requirements of Oeko-Tex Standard 100 are considerably more stringent than existing national legislation.

Clean Shipping Index

The Clean Shipping Index aims to ensure shipping companies use cleaner vessels by ranking the most highly-performing ships. Transport buyers can use the Clean Shipping Index to calculate and minimize their environmental footprint.

Jobman sponsors the Swedish national skills team

WorldSkills Sweden works to increase interest in and to improve the status and quality of Swedish vocational education.

WorldSkills Sweden is backed by a three-way partnership between the Confederation of Swedish Enterprise, the Swedish Trade Union Confederation and the State via the Ministry of Education and Research, the Swedish National Agency for Education and the International Programme Office for Education and Training.

WorldSkills Sweden organizes the Swedish Skills Championships as heats to select the Swedish national skills team, which competes in the World Skills Competition and EuroSkills.
