Durability at work since 1975

## Quality for proud professionals since 1975

Your choice of workwear determines how visible, effective and protected you are at work. Different jobs require workwear with different functionality and durability, and the garments must keep you warm or cool depending on the conditions. Jobman offers a wide range of workwear which can be combined to suit all types of work, both indoors and outdoors, all year round. We speak to users in a wide range of industries to discuss their needs, and convert the knowledge we gain into fully functional workwear adapted to your daily work environment.

Jobman workwear is developed and manufactured for professionals who want the best. Durability has been our watchword since 1975, and so it will always be. At Jobman Workwear, quality isn't just about choosing the right material. The garments must also be comfortable and allow for movement during challenging work. Together with new features and modern design, the clothing also makes you resilient at work. Our vision is for all professionals to be proud wearers of Jobman workwear, every day.

## Quality workwear down to the smallest detail

When you wear Jobman clothing, you are also wearing years of technical and functional development applied to every detail. Together, these important details create comfortable, easy to wear garments with a modern design and exceptional durability. These are clothes that are well designed using generations of solid expertise. Choosing high-quality, durable clothing is also an economically sound and sustainable decision – the basis for our quality ethos that runs through every garment.

One example is our trousers for craft work, designed to meet the specific needs of craftspeople. Hanging back pockets, reinforced holster pockets and a zipped leg pocket ensure easy access to tools and keep your personal effects secure. The materials have been carefully chosen and combined in various areas of the trousers, cut and sewn to fit the body's natural shape. The result is robust trousers that allow for free movement and ventilation where it matters.

## Practical – high-quality workwear, simple and functional

Our Practical collection has been developed to meet the needs of professional craftspeople looking for simple garments that don't compromise on comfort or function. The Practical collection has been specially designed to meet the need for high-quality comfortable and durable workwear, at a lower price than our more specialised garments.

As a customer, you can expect Jobman's trademark quality, in a collection designed with affordability in mind. The wide range is available in many colours and sizes, including high-visibility clothing. The leg length can also be extended by 5 cm. As with all Jobman workwear, these garments are functional from top to bottom.

Jobman Practical – the choice is simple.

## Shell & rainwear

CE

178

## How does our shell and rainwear work?

### Water column and breathability

A fabric's impermeability is measured in millimetres water column (mmwc). This is measured by stretching 10 cm<sup>2</sup> of fabric over an equally large tube. The tube is filled with water and the height of the water column is measured when the first drop of water penetrates through the fabric. A fabric is classified as waterproof when it has a water column of 2,000 mm or more.

A fabric's breathability is measured in grams per square metre in 24 hours (g/m<sup>2</sup>/24 hrs or MVP). The higher the value, the easier it is for the fabric to allow excess humidity and water vapour to evaporate. These two values are both needed in order to determine a garment's properties.

A high water column/denser fabric can have poor breathability. A garment with good breathability is more comfortable to wear and helps prevent the garment from feeling damp inside.

### Taped seams

For the garment to be considered completely waterproof, the garment's seams must be taped otherwise water will penetrate through the seams. This means that a tape is placed over the seams inside the garment. Completely waterproof garments have all seams taped and water-resistant garments have the most critical seams taped. Using a jacket as an example, the seams over the shoulders as well as the front and back seams, which are at risk of being exposed to the most moisture, are taped.

## Spun-Dye T-shirt

- T-shirt in quick-drying fabric.
- Environmentally-friendly production with spun dye.
- Quick drying material.

Comfortable functional T-shirt in "spun-dyed" polyester which quickly transports moisture away from the skin. The shirt dries fast, keeping you dry and fresh all day long. Spun dyeing is an environmentally friendly colouring technique that consumes less water, energy and chemicals. Spun dyeing also gives a very high colour density, which means that the garment's colour does not change over time.

**Material:** 100% polyester Spun dye, 135 g/m<sup>2</sup>.

**Art no:** 65552251-1000 white

**Art no:** 65552251-6700 navy

## Hi-visibility

CE

178

91

## All you need to know about visibility clothing

### Design regulated by EU standard

The design of high visibility clothing is regulated by EU standard EN ISO 20471. It states what colours must be used, where the reflective strips must be located and which information must be included with the garments. Requirements apply to the material's properties to ensure maximum visibility and to enable washing without a loss of visibility. The garments must also be designed a certain way to ensure maximum visibility.

### Tested by selected test institutes

When the garments are approved along with the documentation, a certificate is awarded stating that they fulfil the requirements of standard EN ISO 20471. The garments are CE marked indicating certification and featuring information on care and how the garment should be used.

### High visibility clothing is divided into three classes

Garments are divided into different classes depending on their visibility. Classification is mainly dependent on the garment's fluorescent areas and reflective surfaces.

**Class 3:** Most visible. Total fluorescent area must be at least 0.8 m<sup>2</sup> and the reflective strips 0.2 m<sup>2</sup>.

**Class 2:** Total fluorescent area must be at least 0.5 m<sup>2</sup> and the reflective strips 0.13 m<sup>2</sup>.

**Class 1:** Least visible. Total fluorescent area must be at least 0.14 m<sup>2</sup> and the reflective strips 0.1 m<sup>2</sup>.

In all classes, there must be no more than 10 cm between the reflective strips. This means that the zip on a jacket must be closed, for example.

### Can be combined with other garments

It is possible to combine garments from different classes, however combining classes 1 and 2 does not automatically create class 3. To attain class 3, the clothing's total fluorescent area must be at least 0.8 m<sup>2</sup>. Garments of different colours may also be combined. They must, however, be certified together to allow their whole area to be calculated, otherwise only a single garment's area is applicable.

### Yellow is the most visible colour

The EU standard specifies three approved fluorescent colours: yellow, orange and red. The certificate states that the garments are approved for combining. Tests have shown the colour yellow to be twice as luminous as orange or red. Furthermore, yellow is the only one of the three colours which is fluorescent in direct sunlight and sodium light, which is the type of lighting used in tunnels, for example.

### Reflective strips for visibility in the dark

Fluorescent colours lose their luminosity in the dark. Garments therefore have reflective strips to reflect the light from vehicle headlamps in the dark. Reflective strips on the legs mean the wearer can be seen from greater distances.

## Sun protective garments

UV-garments provide good and full protection against the sun's UV-rays, the type of rays that cause sunburn. Jobman's UV-garments are certified for UPF 40+ and provide excellent protection, in accordance to EN13758-2: 2003 + A1: 2006.

UPF (Ultraviolet Protection Factor) is the measure used on sunblock in sun protective garments, which is similar to SPF (Sun Protection Factor) used for sunscreen lotion. Which UPF class a garment receives depends on how much UV-radiation is passed through the fabric. Jobman's UV-Pro is made with a dense knitting technique that gives the garment a UV-protection without strong chemicals.

## Spun-dye T-shirt

- T-shirt in quick-drying fabric.
- Environmentally-friendly production with spun dye.
- Quick drying material.

Comfortable functional T-shirt in "spun-dyed" polyester which quickly transports moisture away from the skin. The shirt dries fast, keeping you dry and fresh all day long. Spun dyeing is an environmentally friendly colouring technique that consumes less water, energy and chemicals. Spun dyeing also gives a very high colour density, which means that the garment's colour does not change over time.

**Material:** 100% polyester Spun dye, 135 g/m<sup>2</sup>.

**Art no:** 65552251-1000 white

**Art no:** 65552251-6700 navy

**Art no:** 65552251-9800 dark grey

## Duo-pack Underwear

- Ideal underwear as Layer 1.
- Sweat particles evaporate extremely quickly.
- Top with extended back and Long johns with Y-front.

Top with extended back and polo neck with diagonal zip that doesn't chafe the neck. Long johns with Y-front. Elastic side panels. When applying the layering principle, Dry-Tech™ fabric is ideal as layer 1. It is built up from micro-fibres that wick sweat away from the body and spread it over a wider surface area. The microscopic sweat particles then evaporate extremely quickly, keeping you feeling fresh and dry all day long.

**Material:** 70% polyester, 30% viscose, 130 g/m<sup>2</sup>.

**Art no:** 65657951-9900 black

**Size:** XS-3XL

## Helmet Beanie Coolmax®

Helmet beanie with a tight fit in Coolmax® fabric that wicks away moisture. Effective moisture transport keeps you dry under the helmet. Comfortable and snug.

Machine washable.

**Material:** 100% polyester Coolmax®.

**Art no:** 65969183-9900 black

**Size:** One size

| 9930 |

**9693**

## Bandana

Bandana with all-over print. Collar with many function e.g. scarf, collar, hat.

**Material:** 100% polyester.

**Art no:** 65969384-9930 black/orange

**Size:** one size

| 9800 |

**9690**

## Bandana Merino Wool

Warm and insulating collar with many function e.g. scarf, collar, hat. Reflecting details.

**Material:** 70% merino wool, 30% viscose.

**Art no:** 65969083-9800 dark grey

**Size:** One size

| 9900 |

**9280**

## Belt Stretch

Max. length of 130 cm. Stretch feature for extra comfort. 32 mm wide. Silver finish on buckle with Jobman logo.

**Material:** 70% polypropylene, 30% elastane.  
**Art no:** 65928084-9900 black  
**Size:** One size

| 9910 |

**9290**

## Belt

Max. length of 130 cm. Printed with "JOBMAN". 38 mm wide. Bottle opener in the buckle. Silver finish on buckle with J logo.

**Material:** 100% polyester.  
**Art no:** 65929084-9910 black/white  
**Size:** One size

| 9900 |

**9306**

## Leather belt

Leather belt, 36 mm wide. Sturdy buckle with steel pin.

**Material:** 100% leather.  
**Art no:** 65930684-9900 black  
**Size:** 90 cm, 120 cm

| 9900 |

**9275**

## Belt Jobman

Max. length of 130 cm. 32 mm wide. Antique silver finish on buckle with Jobman logo.

**Material:** 100% polyester.  
**Art no:** 65927584-9900 black  
**Size:** One size

| 9900 |

**9011**

**Braces**

Braces with clips. Elastic. Adjustable length. 50 mm wide. Jobman logo.

Material: 70% polyester, 30% elastane.  
Art no: 65901184-9900 black  
Size: One size

| 2100 |

| 9900 |

**9013**

**Braces "No Scratch"**

Braces with plastic clips, reduces risk of scratches. Elastic. Adjustable length. 40 mm wide.

Material: 70% polyester, 30% elastane.  
Art no: 65901384-2100 yellow  
Art no: 65901384-9900 black  
Size: 125 cm

**Stretch Belt "No Scratch"**

Belt "No scratch" in polyester with stretch feature for extra comfort. 35 mm wide. Plastic buckle reduces risk of scratches.

Material: 100% polyester.  
Art no: 65928284-3000 orange  
Art no: 65928284-6700 navy  
Art no: 65928284-9800 dark grey  
Art no: 65928284-9900 black  
Size: 90 cm, 120 cm

| 9900 |

**9493**

## Knife Holster

Knife holster for floorlayers' knives. Fits the thigh pocket in Jobman floorlayers' trousers.

**Material:** 100% leather.

**Art no:** 65949384-9900 black

**Size:** One size

**9916**

## ID Card Holder

Practical ID card holder. Easy to insert and remove the card.

**Material:** Plastic.

**Art no:** 65991684-9900 black

**Size:** One size

| 9900 |

| 7400 |

**9941** **P**

## Kneepads Practical

A basic, light weight kneepad suitable for work with little kneeling. Certified according to EN 14404:2004+A1:2010 Type 2 Level 0 together with Jobman's trousers 2324 and 2325.

**Material:** LDPE

**Art no:** 65994184-7400 green

**Size:** One size

| 3099 |

**9943** 

## Kneepads

Lightweight kneepad for workers on the move who occasionally need to use kneepads. Pre-bent for improved fit and comfort. EVA (Ethylene Vinyl Acetate) for best shock absorption. Harder exterior for increased durability and lifetime.

Certified according to EN 14404: 2004 + A1: 2010, Type 2, Level 1 together with most Jobman trousers.

**Material:** EVA + LDPE

**Art no:** 65994384-3099 orange/black

**Size:** One size

| 9799 |

**9944** 

## Kneepad

Kneepad for frequent users who do work kneeling down but not all day. Pre-bent for improved fit and comfort. EVA (Ethylene Vinyl Acetate) for best shock absorption. Tougher exterior for increased durability and lifetime. Certified according to EN 14404:2004+A1:2010, Type 2, Level 1 together with most Jobman trousers.

**Material:** PE/EVA/RUBBER/POE

**Art no:** 65994484-9799 grey/black

**Size:** One size

| 1099 |

**9945** 

## Kneepads

Kneepad designed to handle several hours' work kneeling down. For users who require kneepads with long durability and lifetime, with minimal compression. Pre-bent for improved fit and comfort. EVA (Ethylene Vinyl Acetate) for best shock absorption. Tougher exterior for increased durability and lifetime.

Certified according to EN 14404:2004+A1:2010, Type 2, Level 1 together with most Jobman trousers.

**Material:** PE/EVA/RUBBER/POE + LDPE

**Art no:** 65994584-1099 white/black

**Size:** One size

# CE marking of protective clothing

The CE marking indicates that a notified body has type approved these garments in accordance with the PPE regulations (EU) 2016/425.

The symbol appears on the care label inside the garment and shows the standards and classes for which the garment is certified. The illustration shows an example of part of the care instructions.

PPE directive 89/89/686/EEC has been superseded by PPE regulation (EU) 2016/425.

- Implementation from 21/04/2018.
- Certificates issued under the directive cease to be valid from 21/04/2023.

A regulation applies in all EU member states and is a binding act that can be cited in a national court of law. In the past, there have been major differences in how the EU directive was applied.

## How do directives differ from regulations?

- The supplier's declaration (DoC/EU declaration of conformity) is available at [www.jobman.se](http://www.jobman.se).
- The supplier's declaration and technical documentation must be stored for 10 years from the product launch.
- The washing label must contain details of the name, brand and address.
- All washing labels, information and the EU declaration of conformity must be available in the official languages of all exporting countries.

The information symbol on the CE label inside the protective garment shows that the garment comes with Jobman's own instructions. Read this information before wearing the garment to ensure that you are using it correctly and are therefore properly protected.

EN ISO 20471

### High-visibility class

Garments are divided into classes depending on their visibility.

Classification is mainly dependent on its conspicuity: the garment's fluorescent area and retro-reflective surface.

**Class 3:** Highest class. The total fluorescent area must be at least 0.8 m<sup>2</sup> and the reflective strips 0.2 m<sup>2</sup>.

**Class 2:** The total fluorescent area must be at least 0.5 m<sup>2</sup> and the reflective strips 0.13 m<sup>2</sup>.

**Class 1:** The lowest class. The total fluorescent area must be at least 0.14 m<sup>2</sup> and the reflective strips 0.1 m<sup>2</sup>.

Detailed information on the visibility rules can be found on page 92.

EN 14404

### Kneepads

Trousers with the symbol are certified according to EN 14404: 2004 + A1: 2010 Type 2 Level 1 together with Jobman kneepads 9943, 9944 and 9945.

EN 342

### Cold

Garments certified in accordance with EN 342 keep you protected from cold (≤ -5°C). Requirements refer to thermal insulation and air permeability. Certifications for the garment set apply in combination with Jobman underwear set and fleece jacket.

EN 343

### Rain

All Jobman's rainwear is certified according to the EU EN 343 standard, the bad weather certificate.

EN ISO 11612

### Flameproof

100% cotton with flame-retardant treatment. CE-certified, tested and approved in accordance with EN ISO 11611 and EN ISO 11612. Certification means that the material and the garment's design protects against edge ignition, flame spread and melting. It can also withstand heat according to the test standards, preventing burns.

EN ISO 11611

EN 13758

### UV Protective

The symbol shows that the garment is certified according to EN 13758, UPF 40+. UPF (Ultraviolet Protection Factor) is the measure used for sunblock in sun garments.

# Washing & care instructions

## Washing

Always follow Jobman's washing instructions shown on the garment. This ensures that the garment's protective features are not compromised or destroyed. Sort first according to the wash temperature and colour, then according to the other washing instructions. Garments marked "wash separately" may discolour or be discoloured by other garments.

## Washing detergent

Use colour-safe washing detergent with coloured garments and follow the dosing instructions on the packaging. Do not use washing detergent containing bleach. Jobman does not recommend rinsing or the use of fabric softeners.

## Drying

Most of the garments feel better when hung to dry. Shake the garment and hang it up. When tumble drying, do not dry the garments completely. This can cause significant shrinkage and wear.

Your Jobman workwear will last longer if you wash and care for it properly.

### Layering

In cold weather it is important to wear layers of clothing to keep warm. Practical layers you can add or take off are especially important when moving between warm and cold spaces.

1. The first layer (layer 1) should transport humidity out to the next layer. Ideally, technical underwear of man-made materials.

2. The middle layer (layer 2) should be insulating fleece, softshell or furry material. Jobman's microfleece garments are extremely comfortable and ideal middle layers.

3. The third layer (layer 3) should be windproof and water repellent to protect you, but must be able to breathe and allow humidity from the first two layers to evaporate.

### Oeko-Tex

Oeko-Tex is an internationally defined standard based on a voluntary undertaking. To obtain a certificate, the entire manufacturing process and all the parts of a garment must comply with stringent human and environmental requirements. With Jobman Workwear you can be sure that you will not be exposed to chemicals that may damage your health. Many of our garments are Oeko-Tex certified, which guarantees that they do not contain substances that may be harmful when worn against the skin.

### Dry-Tech™

The symbols mean that the clothing is moisture-wicking.

### Breathability

The symbol shows that the fabric is windproof, waterproof and breathable. For optimum comfort at work, it is important that the body maintains an even temperature and remains dry. A shell garment lets the body breathe and lets out excess moisture that would otherwise have a cooling effect.

### 4-WAY STRETCH

The symbol shows that the entire or most of the garment is made with 4-way stretch.

### Panels

The symbol shows that parts of the garment are made with 4-way stretch.

## CSR and sustainability

At Jobman, we place great emphasis on sustainability and take responsibility for how our operations affect both people and our planet. Of course, we hope that you are satisfied with our products and also with us as a company.

As a part of New Wave Group, we pursue an active sustainability work towards a vision of sustainable growth where business solutions are not only financially profitable, but also sustainable from a social and environmental perspective.

What makes the biggest difference is how we conduct our everyday business. That is why we integrate sustainability into

our core operations and processes. The work includes, amongst several things, improved working conditions in production countries, a progressive work with chemicals and streamlining transport and logistics.

We invite you to take part of our work at group level with CSR and sustainability. More information is available in New Wave Group Sustainability Report, where we highlight important activities, achievements and ambitions for the future. You find it on New Wave's website [www.nwg.se/csr/](http://www.nwg.se/csr/)

### Amfori BSCI (Business Social Compliance Initiative)

Amfori BSCI is a business driven initiative for companies committed to improve working conditions in the global supply chain. Our Code of Conduct have requirements on minimum wage, working hours, the prohibition of child labour and several other important criteria.

[amfori.org/content/amfori-bsci](http://amfori.org/content/amfori-bsci)

### Textile Exchange

Textile Exchange is an international non-profit organization working for responsible expansion of the textile industry and the organic cotton production.

[textileexchange.org](http://textileexchange.org)

### THE SWEDISH Chemicals Group

The Chemicals Group is arranged by RISE, a world leading research group with a key role in the Swedish innovation system. In this network we receive the most updated information on chemical legislations and developments.

[kemikalgruppen.se](http://kemikalgruppen.se)

### Clean Shipping Index

The Clean Shipping Index aims to ensure shipping companies use cleaner vessels by ranking the most highly-performing ships. Transport buyers can use the Clean Shipping Index to calculate and minimise their environmental footprint.

[cleanshippingindex.com](http://cleanshippingindex.com)

### International Accord For Health And Safety In The Textile And Garment Industry

The International Accord is a binding agreement designed to improve fire- and building safety for the textile industry in Bangladesh. The Accord includes inspections, fire safety training as well as effective remediation and renovations. The ambition is to expand the program to other production countries.

[www.internationalaccord.org](http://www.internationalaccord.org)

### Swedish Textile & Clothing Industries' Association

Jobman Workwear is a member of the environmental group at TEKO. TEKO, Swedish Textile and Clothing Industries' Association is the joint industry and employers' organization for the Swedish textile and clothing industry. The members have regular meetings and discuss e.g REACH, sustainable materials, packaging, eco-labeling, permit processes.

[www.teko.se](http://www.teko.se)

## Oeko-tex® -certification

### What does the label mean?

OEKO-TEX® is the world's leading and best known certification for textiles, leather and accessories that have been tested for harmful substances.

If a textile article carries the STANDARD 100 label, you can be certain that every component of this article, i.e. every thread, button and other accessory, has been tested for harmful substances and that the article therefore is harmless in human ecological terms.

The test is conducted by independent OEKO-TEX® partner institutes. In the test they take into account numerous regulated and non-regulated substances, which may be harmful to human health. In many cases the limit values for the STANDARD 100 go beyond national and international requirements.

More information on OEKO-TEX® official website:  
[www.oeko-tex.com](http://www.oeko-tex.com)

### Test criteria

Examples of parameters that are included in the Oeko-Tex® Standard 100 are prohibited azo dyes, carcinogenic and allergenic dyes, phthalates, formaldehyde, pesticides, heavy metals, certain organochlorine and organotin compounds, biologically active products, and flame retardant materials.

### Four classes of products

In order for the limits to be relevant for different types of products, there are four different types of product classes based on the certified product's intended area of use:

**Product Class I** – Products for children up to 3 years.

**Product Class II** – Products that mostly come in direct contact with skin.

**Product Class III** – Products which do not come in contact with the skin, or do so only to a small extent.

**Product Class IV** – Furnishing and decorative materials.

### The Oeko-Tex® brand

A product may only be Oeko-Tex® labelled or certified if all the components meet the requirements for the appropriate product category. The product must also belong under one certificate. STANDARD 100 by OEKO-TEX® continuously adapts the requirements to the REACH legislation for relevant parameters.

The certificate is valid for one year (12 months) with a specific date.

For information regarding certified articles [www.jobman.se/en/](http://www.jobman.se/en/)

## WorldSkills Sweden

WorldSkills Sweden's mission is to raise the status, quality and attractiveness of Swedish vocational education. One way it does this is by organising professional competitions such as the WorldSkills Sweden Championships and advocating for the Swedish National Skills Team's participation in the World Skills Competition and EuroSkills.

There is a high need for recruitment in various professions and industries that require vocational training. Despite this, there is often a lack of young people with the necessary interest and skills. For Swedish companies to be competitive, including in the global market, it is vital that they have the relevant skills.

Sweden's business community needs employees who can use new technology to create products and services with qualified

content. Long-term skills supply to the business community is therefore an important priority.

WorldSkills Sweden is a collaboration between the Confederation of Swedish Enterprise (Svenskt Näringsliv), the Swedish Trade Union Confederation (LO) and the Swedish Government through the Swedish National Agency for Education (Skolverket), Ministry of Education and Research (Utbildningsdepartementet) and Swedish National Agency for Higher Vocational Education (Myndigheten för yrkeshögskolan). It also involves professional organisations, vocational committees, government agencies, schools and companies active in this important initiative.

**For further information: [www.worldskills.se/english](http://www.worldskills.se/english)**

## Size guide

Jobman offers a wide range of sizes, particularly for trousers. It is important to choose the right leg length for trousers with kneepad pockets, so that they are correctly positioned on the leg. All of our men's trousers are available in three size categories. C sizes with normal leg length, e.g. C50, C sizes with long leg, e.g. C150, and D sizes with short leg, e.g. D96. If you are not able to try on the clothes in the shop, you can take your measurements to ascertain the right size. Take your measurements while wearing close-fitting underwear and do not pull the measuring tape too tight. See the size chart on the next page.

### A | Chest

Measure the circumference around your torso at the widest part of the chest/bust.

### B | Waist

Measure the circumference at the same level as your belly button or at the narrowest part.

### C | Hip

Measure the circumference around your hip at the widest part.

### D | Inside leg

Measure from the crotch down to the sole of your foot. Make sure the tape is straight.
